HTML

CSS

JavaScript

Bootstrap

### EDUCATION

**B.S Nutritional Science**

**San Jose State University**

2018-2023

### LANGUAGES

English

Turkish

### PROFILE

I recently graduated from San Jose State University. During my time at San Jose State, I was a part of the San Jose State Men's Water Polo team through 2018-2021. I think my sports career helped me with being more disciplined and more goal-oriented. It taught me how to work as a team player and helped me become a lot more efficient in the work I do. Being a foreign student helped me improve my adjustment skills and showed me the importance of planning ahead. I have started my web development journey in May of 2023. Since then I have been enrolled in Full-Stack Engineer path in Codecademy and I have earned various certificates from different available sources such as Codecademy and Free Code Camp.
