EXPERIENCE

AI Trainer -Remotasks, Part-Time Freelance

September 2023 -To Date
- Evaluating the quality of AI-generated code, including human-readable summaries
- Solve coding problems, writing functional and efficient code.
- Writing human-readable summaries of coding problems and solution

----

PROJECTS

Pixel Painter Web Application

Conceptualized and developed a creative and interactive web application called "Pixel Painter" designed to bring out the inner artist in users.
- HTML - used various types of HTML components to create buttons and color palette
- CSS - Used CSS to design an intuitive and user-friendly interface, complete with tooltips and clear icons, to make the application accessible to users of all skill levels.
- JavaScript - Used JavaScript to create "pixel" boxes to be painted, used various event listeners to increase interactivity such as creating grid and clearing grid buttons

Personal Portfolio Website

Created a dynamic and visually engaging personal portfolio website to showcase my skills, achievements, and projects.
- HTML -Created multiple HTML components such as navigation bars, buttons and footers
- CSS - Used CSS to implement a responsive and interactive UI
- JavaScript - Used Javascript to increase the user friendliness of the website and to implement dark theme

Jammming Playlist

Leveraged the power of React to architect a dynamic and responsive web application that provides users the ability to create playlists and add that playlist to their Spotify account.
- React - Used tools such as Hooks, JSX and React components to manipulate DOM
- HTML - Used basic HTML to create a container for React manipulation and CSS design.
- CSS - Used complex CSS concepts to create interesting UI
- JavaScript - Used JavaScript API logic and functions such as fetch and async await to grab the neccesary information from Spotify API
